SignDex

SIGNDEX | SignDex vs. Docusign

Digital signing for your business. Your storage. Your signing identity. Your workflow.

Certificate-based signatures for every signer, built-in e-KYC, company-owned storage and flexible signing workflows.

	SIGNDEX	DOCUSIGN
Bring Your Own Storage Company-owned cloud file storage	YES	NO
Certificate-based signature for every signer Included by default with SignDex	YES	PARTIAL
Flexible signing workflows Sequential, parallel and quorum with SignDex	YES	PARTIAL
Built-in e-KYC identity checks Standard and Trusted ID signing	YES	YES

WHY CHOOSE SIGNDEX

Individual signatures. Identity checks. Your control.

Your storage

Connect company-owned cloud storage, such as Azure Blob Storage or Amazon S3.

Every signer verified

A certificate-based signature for every signer by default, with built-in e-KYC checks available.

Flexible workflows

Sequential, parallel and quorum signing for different business decisions.

SignDex

HOW THEY DIFFER

More control over storage and signing

SignDex: individual signatures as standard

Data residency in your control
Your data is stored on local servers in Malaysia, so it stays in-country.

- Certificate-based signature for every signer, included by default
- Sequential, parallel and quorum signing
- Bring Your Own Storage
- Built-in e-KYC for standard and Trusted ID signing

Docusign: an established global ecosystem

- Platform tamper-evident seal in standard eSignature
- Individual certificates through separate digital-signature offerings
- Confirm quorum signing setup
- Identity-verification coverage varies by service and country
- Storage regions: US, Canada, Europe, Australia, Japan

Every signer: certificate-based by default	**3** workflow types	**5** PDFs per envelope	**BYOS** S3 and object storage
