Handwheels for mobile storage cabinets, **with or without lock**, **with or without key**

Handwheels for mobile storage cabinets mounted on a trackway

The D601-D604 handwheels are made of polyamide, with a diameter of 100 mm. They are designed for use on trackways and are available in two versions: with or without a lock and with or without a key. The handwheels are black and have a smooth, rounded design. The lock version has a small green button in the center. The handwheels are mounted on a trackway using a screw and a nut. The handwheels are suitable for use in environments with a temperature range of +135°C to -30°C. They are RoHS compliant and are a protected model.

Material:

Polyamide (polyamide). Black (RAL 9011).
