

SOLUTION SUMMARY

ALFRESCO CONTENT SERVICES

Open, Flexible, Highly Scalable Enterprise Content Management Platform for Cloud-Native deployments

Alfresco Content Services provides Cloud-native, Open- source, highly scalable enterprise content services platform that enables organisations to work with business content from within the world's leading productivity suites and tools — without switching applications.

Take full advantage of modern content services platform by building business solutions in the cloud or on-premises using micro-services and Cloud-Native Architecture.

Hyland™

HIGHLIGHTS

Open, Easy to integrate and extend

- Alfresco offers Open, modular architecture and ReST APIs and SDKs allow you (or a Hyland partner) to extend your Content Services platform to meet business requirements.
- The Alfresco Development Framework provides a wide range of highly configurable, reusable components that you can use to create modern, responsive web and mobile end-user applications

Scalable, Cloud-Native Architecture

- Alfresco offers a Cloud-Native Architecture so that you can take full advantage of content services platform.
- Modular, scalable architecture optimized for content model flexibility and performance at scale.
- Integrations to cloud storage: Alfresco Content Connectors for Amazon S3, Amazon S3 Glacier, and Microsoft Azure Worm let you meet application and compliance storage requirements with your cloud vendor of choice
- Automatically enrich content and gain valuable insights with AI and natural language processing with AWS such as Amazon Textract, Amazon Transcribe, Amazon Comprehend and Amazon Rekognition

Enterprise Search and Artificial Intelligence

- Gain flexibility with Alfresco Search, powered by Elasticsearch, to locate the exact content easily and quickly.
- Integrate Alfresco with Intelligent Search Engines, such as Amazon Kendra and Amazon Bedrock to enhance user experience by embedding Artificial Intelligence and Generative AI capabilities in Alfresco Content Services platform.

BUSINESS BENEFITS

Increase Security and Compliance

- Alfresco Content Services platform reduce business risk and strengthen compliance with information governance capabilities that offer an unmatched combination of simplicity and control.
- Gain a framework to meet records management and open government compliance standards worldwide, including ISO 15489, ISO 16175, FOIA, U.S. DoD 5015.02 CH2 and CH3, EgovG and MoReq.

Extend Collaboration and User Efficiency

- Alfresco tightly integrates cloud office suites like Microsoft 365 and Google Docs for real-time collaboration and co-authoring of documents
- The Alfresco Digital Workspace and Mobile Workspace increases productivity through quick, easy access to files and workplace items.
- Customers can extend their applications to meet specific user needs and enhance your core content management capabilities (using the Alfresco Developer Framework).

Flexible Deployment Options

- Deploy Alfresco Content Services on your self-managed infrastructure with a public cloud vendor or on-premises in a VMWare or on the choice of Container / Kubernetes platform.
