

GenAI enabled alternative to Alfresco Share

DigiWorks is the GenAI enabled evolution of Alfresco Share and the Activiti App for business users, taking the Alfresco ADF app to the next level. It redefines the user experience for Document Management, Knowledge Management, Case Management, Workflow/BPM and Reports/Analytics, making it smarter, more intuitive, and incredibly efficient.

Document Management

- Navigate folder structure in tree-view manner with breadcrumbs.
- Upload single or multiple documents and folders.
- Create documents using pre-configured templates.
- Edit / co-author documents with Microsoft 365 or Google Workspace.
- Global Search or Search within folder.

Workflow / Case Management

- Task inbox for assigned and pooled tasks.
- Search and filter tasks, save filters.
- Approve, reject or reassign tasks.
- Integration with digital signature solutions.
- Manage cases, with case reference number.
- View workflow and case history.

Records Management

- Create and manage electronic and physical records tracking.
- Configure Records Retention Schedules.
- Create and Manage Record Holds.
- Transfer or Destroy Records.
- File Plan Automation and records auto-numbering.
- Apply Security Classifications.
- View and file detailed Audit trail.

Reports and Analytics

- Out of box reports and analytical dashboards.
- Documents and folders reports.
- Records and retention schedule reports.
- Workflow tasks and processes reports.
- Design ad-hoc reports.

GenAI tools

- Ask AI / Chat
- Detect and Redact PII
- Generate tags
- Summarize Documents
- Translate Documents
