

Hyland™ | Alfresco™

Manage Content Chaos with Federated Records Management

Manage and Regulate Silo repositories using centralised DoD 5015.2
Certified and ISO 16175 Compliant Alfresco platform

Tuesday, 26 October | 11:00 am (Singapore Time)

Manage Content Chaos with Federated Records Management

Content chaos, or content sprawl, results when documents are stored in multiple repositories, in different business applications, or on network drives. While a single repository can offer significant advantages and “a single source of truth,” the large migration effort can be risky.

Alfresco Federation Services avoid the risks of complex migrations and lets users find and manage information faster across more than **60 leading business systems and content repositories** such as **Documentum, OpenText** and **IBM FileNet** as well as **Network Drives** and **emails**.

Join Mr. Saravanan Kolandagounder- Sales Solution Consultant from Hyland and Mr. Hemant Prasad – CEO of Crest Infosolutions Solution, for an in-depth conversation about how Alfresco Federation Service enables customers to gain a single view of information across content silos.

[RSVP Now](#)

Key Highlights of the Session:

- **Discover Contents and Records across disparate systems** like SharePoint, FileNet, Network Drive and Databases (Oracle, MS SQL etc.)
- **Mange Records in-place and automate Retention** and Disposition lifecycle to meet Compliance Requirements, including **ISO 15489, ISO 16175, FOIA, U.S. DoD 5015.02 CH2 and CH3, VERS, EgovG, and MoReq**.
- **Apply Security Classifications** such as **Confidential, Secret** and **Top Secret** etc.
- **Intelligent Content Migration** to Consolidate Contents and Records.
- **Live Demo!** of Alfresco Federation Services and Governance Services.
- **Q & A.**
