Program Notes

The Jet Stream is a fast flowing current of air found high in the atmosphere. This composition portrays the various speeds and motions of these air currents. It begins with a series of festive fanfares which lead to a soaring melody, first heard in the flutes, then joined by the oboes and trumpets the second time through. This section leads to a powerful conclusion, which segues into a modulation and slower treatment of the melodic material. This middle section builds to a climax, which brings a triumphal return of the original material.
