# New in Dorico 5

## Create music that moves

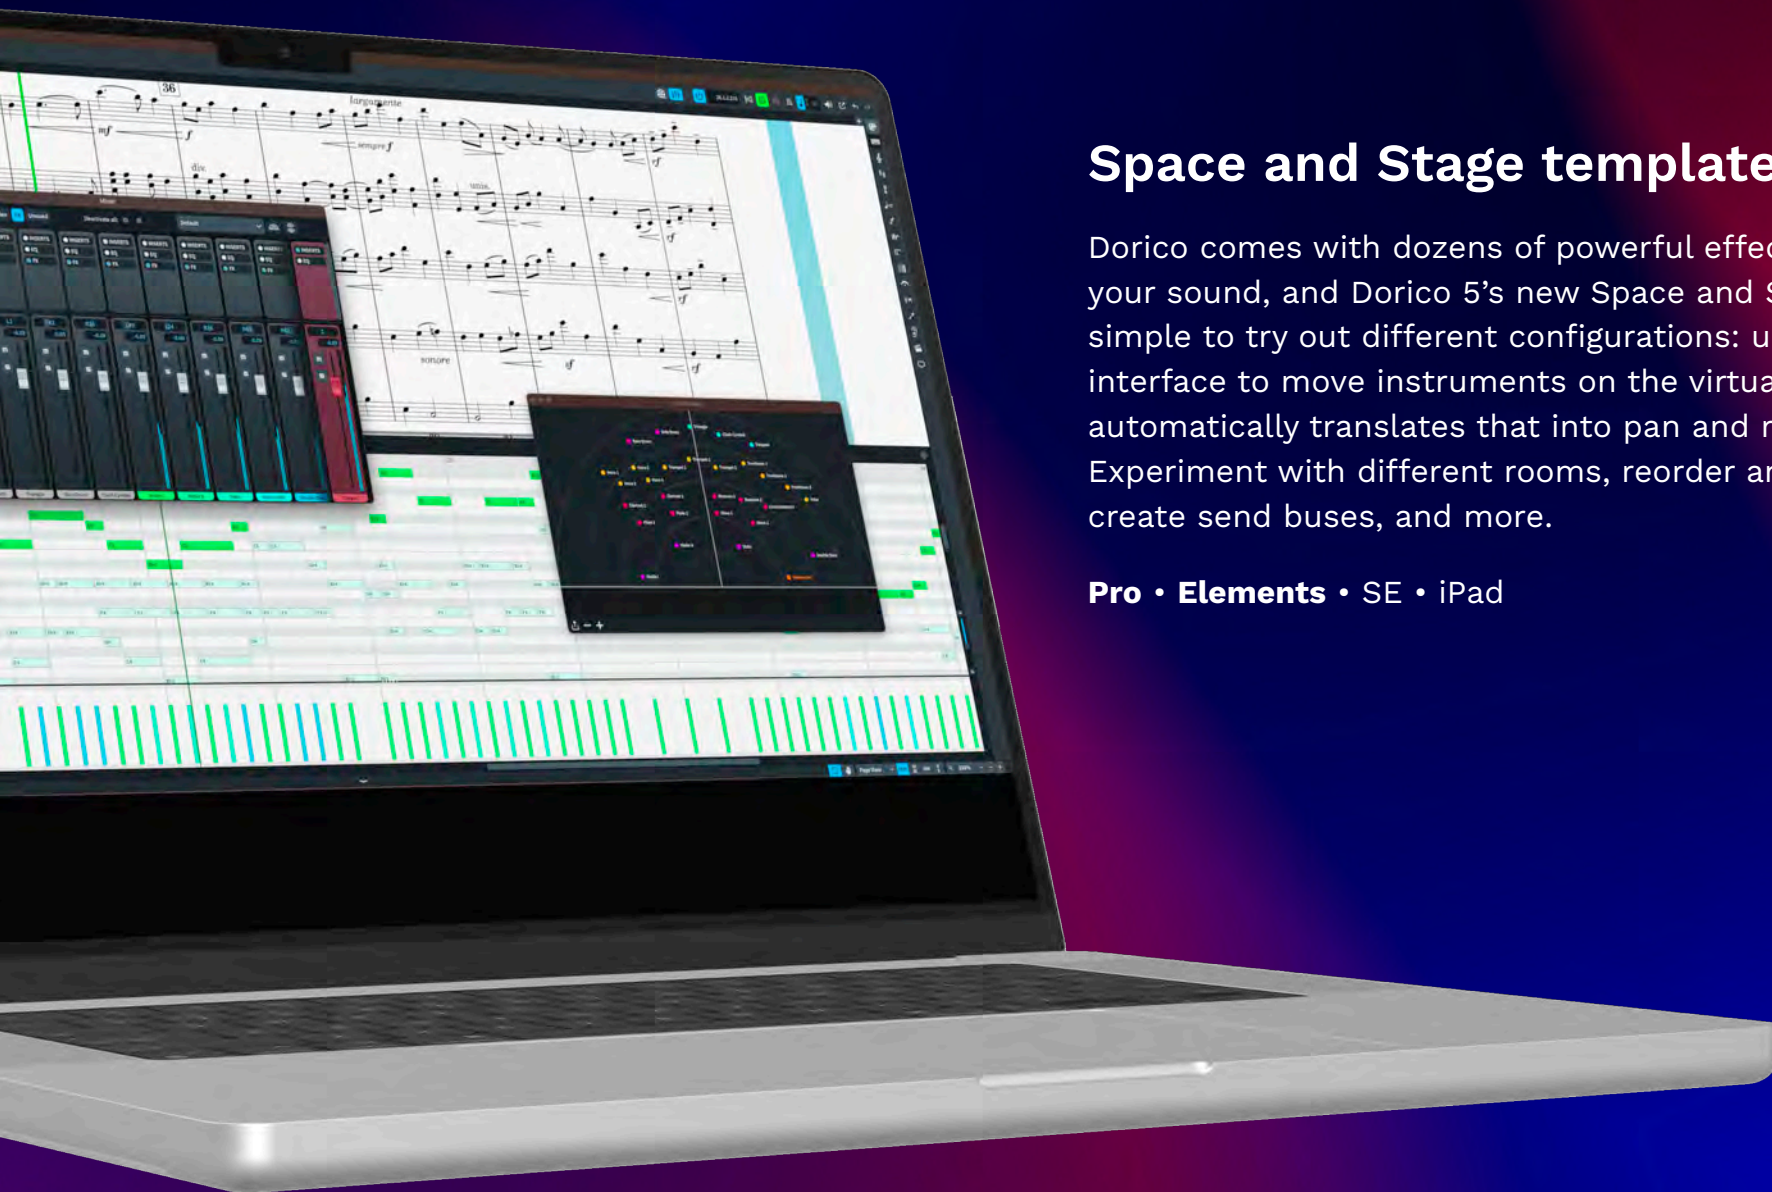

Music has the power to move us in ways that words alone cannot. With Dorico 5, you have the tools to create music that moves others.

Our latest version takes playback to new heights, delivering realistic and human-sounding performances that will captivate your audience.

And with improvements throughout the application, you'll have everything you need to bring your musical vision to life. Let Dorico 5 be your partner in creating music that moves.

# New in Dorico 5

## Space and Stage templates

Dorico comes with dozens of powerful effects processors to sculpt your sound, and Dorico 5's new Space and Stage templates make it simple to try out different configurations: use a simple visual interface to move instruments on the virtual stage, and Dorico automatically translates that into pan and reverb settings. Experiment with different rooms, reorder and rename outputs, create send buses, and more.

**Pro • Elements • SE • iPad**

# New in Dorico 5

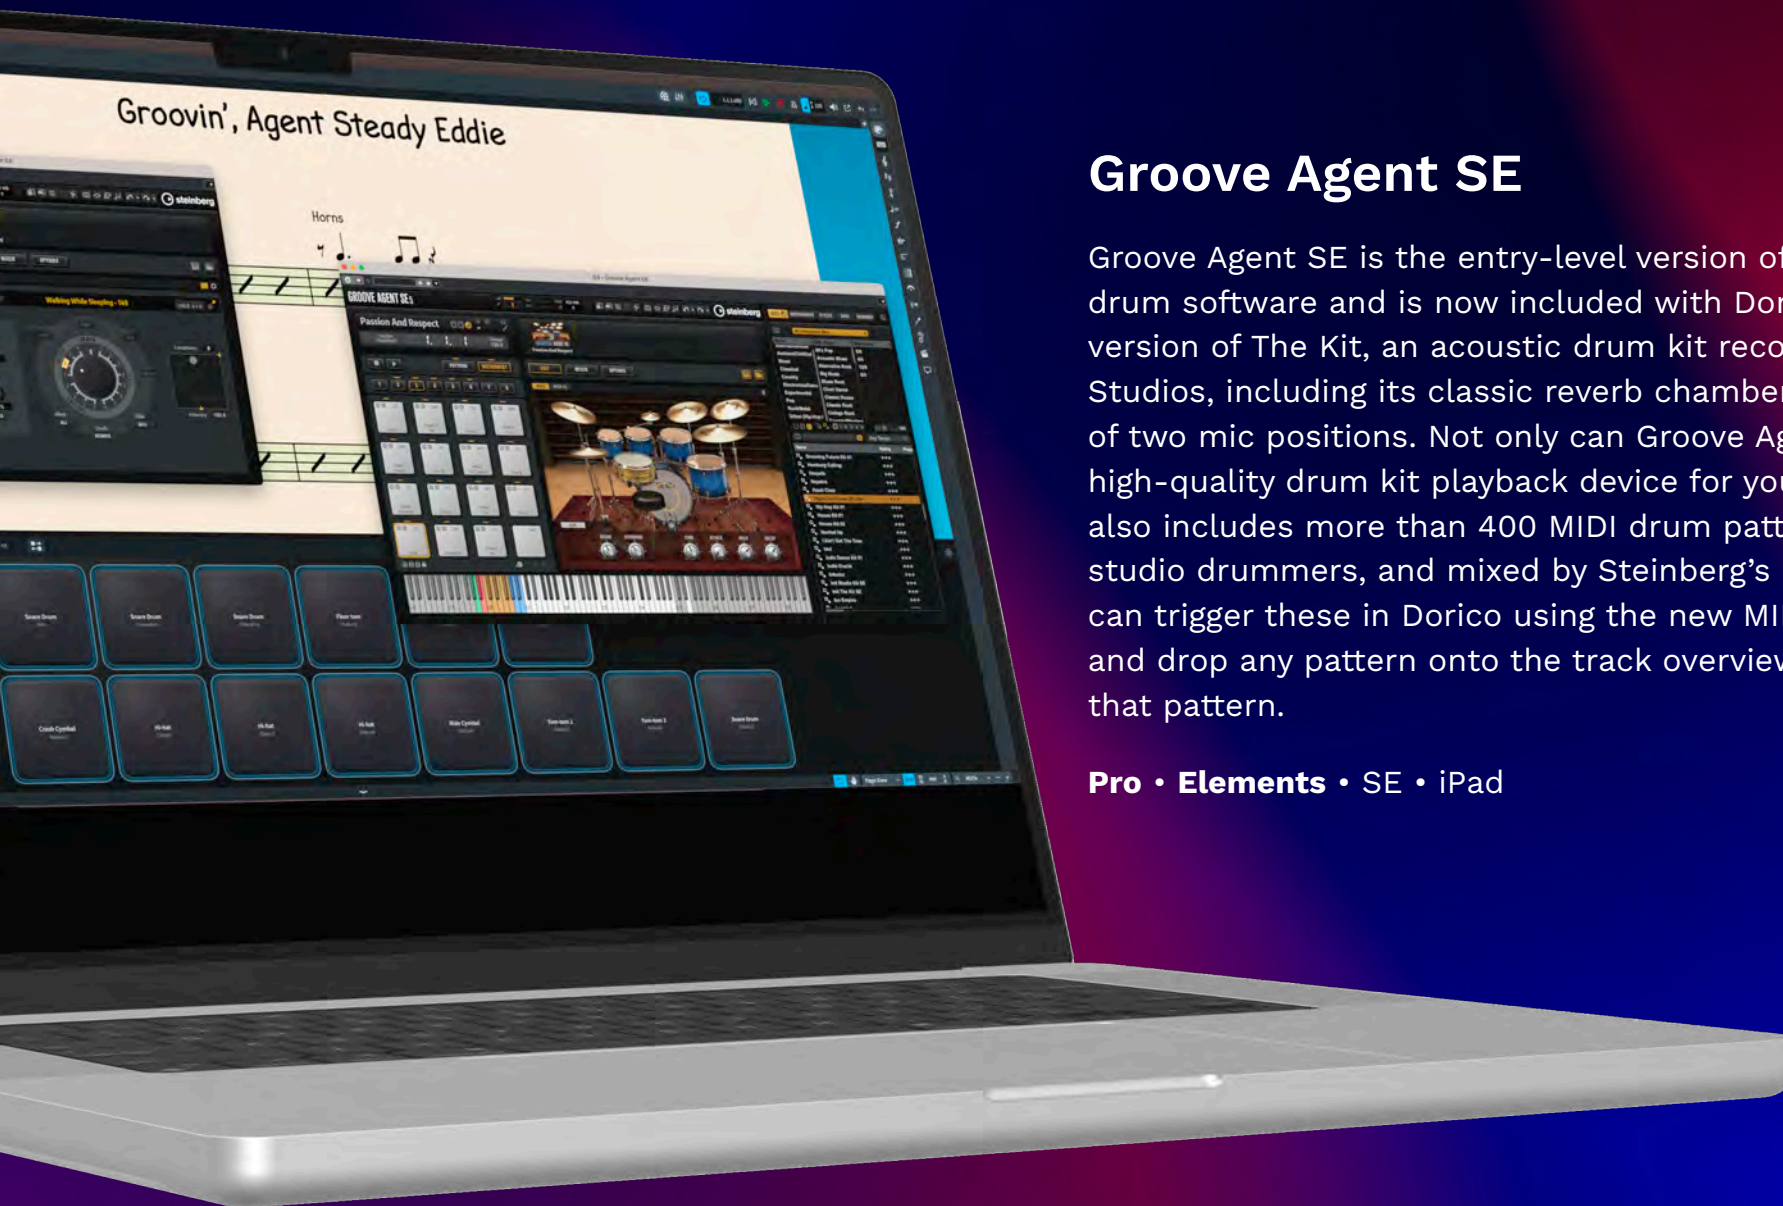

## Pitch contour emphasis

Dorico reads the notations in your score the way a human musician does, automatically switching to different articulations and playing techniques using whatever sample library you choose. Building on these foundations, Dorico's playback is more expressive than ever, using sophisticated algorithms to breathe life into phrases in the same way human musicians do. No longer do you need great keyboard skills to bring your notated music to life.

**Pro • Elements • SE • iPad**

# New in Dorico 5

## Groove Agent SE

Groove Agent SE is the entry-level version of Steinberg's creative drum software and is now included with Dorico 5. It includes a version of The Kit, an acoustic drum kit recorded in Berlin's Teldex Studios, including its classic reverb chamber, and provides a choice of two mic positions. Not only can Groove Agent SE be used as a high-quality drum kit playback device for your Dorico projects, but it also includes more than 400 MIDI drum patterns, performed by top studio drummers, and mixed by Steinberg's expert engineers. You can trigger these in Dorico using the new MIDI trigger region or drag and drop any pattern onto the track overview in Play mode to import that pattern.

**Pro • Elements • SE • iPad**

# New in Dorico 5

## MIDI trigger regions

Dorico's new MIDI trigger regions play a note or chord that doesn't appear in the score for a period of time determined by you. This is especially useful for triggering MIDI patterns in plug-ins like Groove Agent SE, or other pattern-based instruments such as TGuitar. If you're writing for a real drummer or guitarist, you don't need to write out their part in full: give them the structure of the piece, a few rhythmic cues, and chord symbols, and they'll take care of the rest. But if you want to have some realistic playback without spending a lot of time and effort writing out music that won't ultimately be played by your human musicians, pattern-based plug-ins can save a lot of time.

**Pro • Elements • SE • iPad**

# New in Dorico 5

## Scrub playback

Dorico 5 introduces a new scrub playback feature that makes it easy to audition the whole ensemble or a single instrument at any point and move forwards or backwards through the playback at any speed. This is invaluable for checking harmonies, finding wrong notes, and focusing on specific moments in your music.

**Pro • Elements • SE • iPad**

# New in Dorico 5

## Instrument editor

Dorico includes definitions for over 600 pitched and unpitched instruments, but no database can capture every variation of instruments or include all cultures and historical periods. With Dorico Pro 5, you can modify or create instrument definitions to suit your needs, and easily reuse them in future projects.

**Pro • Elements • SE • iPad**

## Live editing

Dorico 5 includes new features to quickly edit and copy music using the mouse. You can drag selected notes to alter their pitch, or drag them to new rhythmic positions, with a live overlay to show you where the notes will be moved to. Interacting directly with the mouse makes it easier and quicker to sculpt your music, whether you do it directly in the notation or in the Key Editor.

**Pro • Elements • SE • iPad**

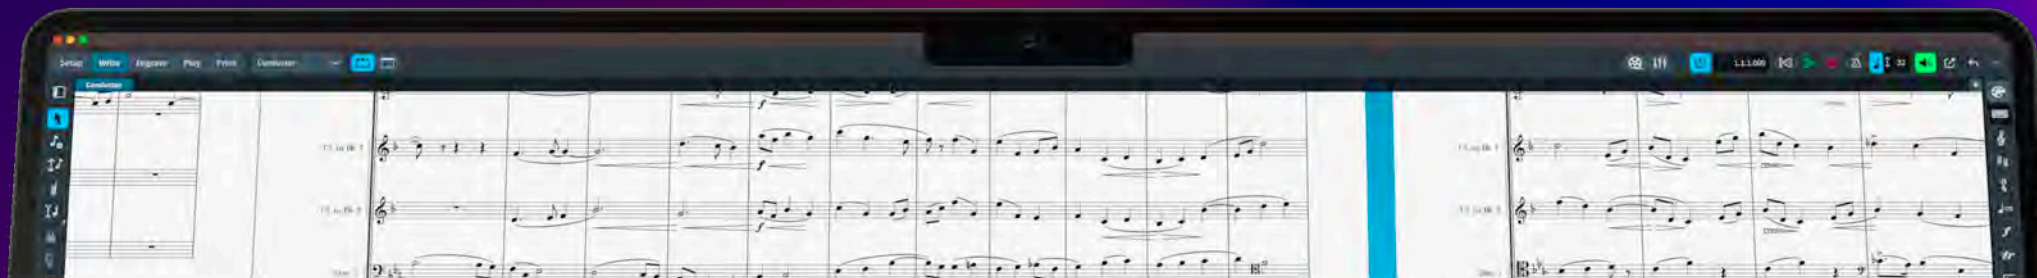

## MusicXML import/export

MusicXML is the widely supported interchange format for exchanging music notation data between applications. Dorico 5 brings enriched support for importing harmonics, playing techniques, ornaments, holds and pauses, and more. MusicXML export is also improved, with page layout information now included, and basic support for encoding information about the music and text fonts used in the project.

**Pro • Elements • SE • iPad**

## New music fonts

Dorico 5 includes no fewer than eight new music font families to bring greater variety to the look of your projects: four new handwritten-style fonts, and four engraved fonts, all available at the click of a single button. **Pro • Elements • SE • iPad**

# New in Dorico 5

## New in Dorico Elements 5

More capable than ever, with enough functionality and power for all but the most demanding professionals. If you're using Dorico at home, at school, or at university, Dorico Elements has everything you need to make beautiful scores. Dorico Elements 5 brings many new capabilities that were previously only available in Dorico Pro, including:

- Write for ensembles of any size (previously limited to 24 players)
- Expanded Engrave mode with horizontal and vertical spacing control
- Customizable playback options
- Customizable text and music fonts

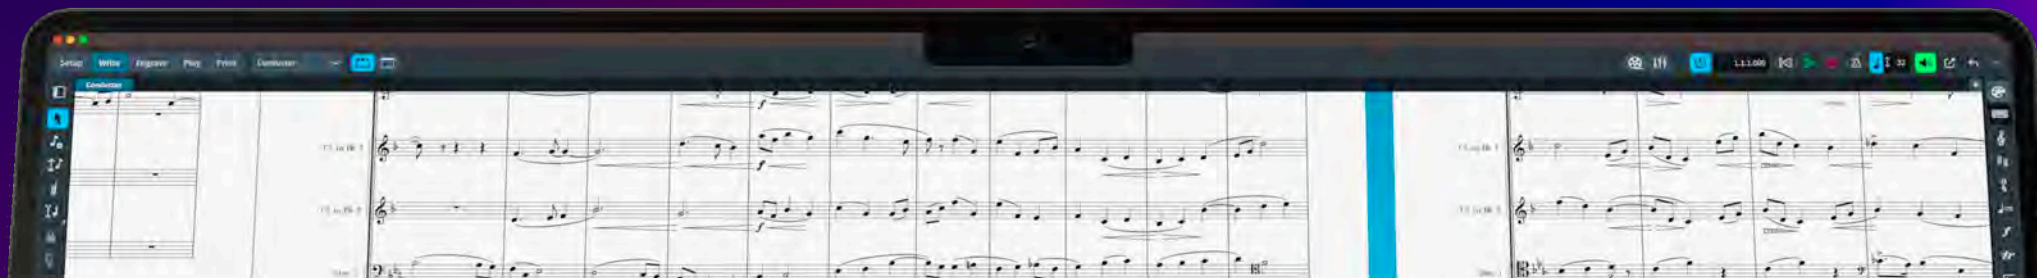

All of the above new capabilities are also included in Dorico for iPad if you choose to buy the optional monthly or annual subscription, or purchase the one-off Lifetime Unlock in-app purchase.

## New in Dorico SE 5

Dorico SE is the free music notation and composition software that puts unique capabilities into the hands of all musicians.

No other free music notation software includes Dorico's flexible note input and editing features, integrated Key Editor for detailed MIDI control, full support for any VST3 virtual instruments and effects including powerful playback templates, or produces such beautiful results so quickly.

Dorico SE 5 not only includes many of the new features added in Dorico Elements 5 and Dorico Pro 5, but also allows you to write for ensembles of up to 8 players (previously limited to 2 players).

## License management

Dorico 5 uses Steinberg Licensing, our identity-based license management system. Users must sign in to Dorico using their Steinberg ID. An Internet connection is required for online license activation. Software licensed using online activation can be activated on three computers, for the personal, non-simultaneous use of the person associated with the Steinberg ID.

If the user's computer cannot be connected to the Internet for any reason, it is possible to activate the software using the Internet connection on another computer, transferring an activation to the offline computer using a USB drive.

Dorico for iPad uses Apple's standard App Store licensing model, namely that the software can be installed and used on up to five devices registered with the same Apple ID.
