About the Composer

Steve Wiest is a multiple Grammy-nominated trombonist, composer, author, and cartoonist. The former soloist and writer for Maynard Ferguson, Steve went on to perform on the road with Doc Severinsen and the Old Tonight Show Orchestra as well as many other artists. Steve has numerous recordings out as a leader, the most recent of which is the debut album from the critically-acclaimed all-star horn band Vinyl Hampdin. Along with being the trombonist with the group, Wiest has composed and arranged all eleven tracks for their new recording titled "RED." Joining Steve in Vinyl Hampdin is an all-star assemblage of Grammy and Juno winners: Lisa Dodd, Frank David Greene, Ray Herrmann, Sly5thAve, Stockton Helbing, Ryan Davidson, Eric Gunnison, Art Bouton, and Gerald Stockton.

In the world of jazz education, Steve was formerly the Director of the One O'Clock Lab Band at The University of North Texas and Co-chair of Jazz Studies at The University of Denver's Lamont School of Music. In high demand as a clinician, composer and conductor, Wiest has directed many all-state ensembles and appeared as a guest artist and clinician all over the world.

It's Not Working

Here is another one of my original works that was inspired by something one of my children did when they were young. In this case, it was my son Matthew, and he was somewhere around five years old. It was winter in Wisconsin, and we were all at our church one Sunday. Matthew had on a big puffy coat, snow pants, boots, knit hat, and mittens. At the ramp in front of the sanctuary—installed for accessibility—Matthew had the idea of running up to the ramp then plopping down on his belly creating what he hoped would be a long slide. The approach was perfect, the plop...excellent! But then his coat caught on the non-slip safety surface installed on said runway. Matthew instantly came to a halt, waited two beats, then said "It's not working."

Alas, no slide, but on that day, this chart title was born. Thanks Matthew!

REHEARSAL TIPS

In general, the most effective way to learn this piece is by listening to the demo track while following along and counting your specific part. In this way, you can hear and see the nuance involved in playing funky lines that still swing.

To illustrate Matthew's quick stop in our story once he plopped down on the ramp, the music in this piece stops abruptly throughout. Usually, the gap that the halt in the action creates is filled in by a pyramid in the horns. For example, beginning in Measure 45, the Piano plays the entire pyramid melody, while the horns have individual entrances where portions of that Piano melody are divided among various instruments. Each horn needs to sting their entrance as notated, but then back off on the volume so you can hear the next entrance. Once all the notes of the pyramid chord are in place, everyone can crescendo. Also, it is very important for each horn to count all the time they are playing their part of the pyramid to keep track of the entire phrase.

Drums: the "funk swing feel" that first shows up in Measure 9 is key to the whole chart. The first backbeat is on the and-of-two giving the groove its straight eight funky feel while the Ride Cymbal is playing more of a swing pattern. This is a situation where it will be easiest to listen to what the drummer did on the demo recording and just do that!

Piano: Play the figure and voicing in Measures 17-24 as is. This is a very distinctive minor with a major 6th effect that is important to establish. During the horn interplay that follows it would be a good idea to play all those figures as written as well to create a solid foundation for all of the funky syncopation going on in the horns.

Bass: you have a slower moving melody (introduced first in Measure 17) that stays static while everyone else is being syncopated and funky. You get to play a sort of *cantus firmus* as a theme that anchors everything. Guitar: you are doubled with various horn parts melodically throughout the entire chart (except for the solo section, where you have the option of comping) Listen for who you are doubled with to make sure you are locking up with the way they are playing a given line.

Horns, there are LOTS of individual entrances that collectively create a nice funky effect throughout this piece. After initially taking turns with the brass on downbeats in measure 25, a great example of this is the phrase that first appears in measure 37 where Bass Trombone and Bari Sax play on two and three followed by the rest of the brass on four, then they swap out again with Bass Trombone and Bari on one followed by the rest of the brass on beat two. As with all figures in a large ensemble, counting your part and feeling an internal beat is paramount.

Have fun!

103 On cue (last solo with/bkgds)

The image shows a page of a musical score, likely for a rock band. The score is written for various instruments, including Saxophones (A. Sax. 1, A. Sax. 2, T. Sax. 1, T. Sax. 2), Trumpets (Tpt. 1, Tpt. 2, Tpt. 3, Tpt. 4), Trombones (Tbn. 1, Tbn. 2, Tbn. 3, Tbn. 4), Guitar (Gtr.), Piano (Pno.), Bass, and Drums. The score is written in a key signature of one flat (B-flat) and a common time signature (C). The music is in a rock style, with a focus on saxophone and brass instruments. The score includes a large diagonal watermark that reads "For preview only" and "Excelcia Music Publishing". The page number "103" is visible at the bottom.
