

SECTION 1

Your ear hears many different things when you listen to music. With training and special study you can train your ear to hear what music is made of. Along with training the ear, this course correlates music theory and writing music.

The first sounds you will hear are called high and low. Tones may range from very high to very low. The first questions ask you to write whether the second tone is higher or lower than the first tone.

Question

1

Each pair of tones will be played twice. Write your answers in the blank spaces. Write L for lower and H for higher. Are you ready?

Is the second tone higher or lower than the first tone? Write L for lower and H for higher.

Pair 1 _____ Pair 2 _____ Pair 3 _____ Pair 4 _____

Question 1 will be repeated so that you may become used to this book.

You may now check your answers with the answer sheet in the back of this book or follow your teacher's instructions.

2

More of the same. Each pair will be played twice. Is the second tone higher or lower than the first tone? Write L for lower and H for higher.

Pair 1 _____ Pair 2 _____ Pair 3 _____ Pair 4 _____

You may now check your answers.

Write the last note of each of these tunes.

You may now check your answers.

Write the last note of each of these tunes.

You may now check your answers.
